

Net neutrality benefits everyone. These corporations already have a monopoly on access and ISPs. We DON'T need to make it more expensive for us and easier/more revenue plentiful for them.

This will NOT motivate companies to spend on their infrastructures and the decrease in these companies capital expenditures (5.6%) that Chairman Pai says will be fixed by destroying Net Neutrality is myopic, at best, in it's reasoning.

This could also be a result of other factors such as pending mergers, extreme weather fluctuations, and caustic federal election spending.

Let me be clear: DO NOT DESTROY NET NEUTRALITY AS WE KNOW IT!

Thank you,
Andy Warywoda
